# Joaquin Armando Camara Rivera

Go Engineer

I am a software engineer who has been working with a variety of applications. Specialized in Golang, JavaScript and some front-end frameworks and libraries such as React.js, Redux.js, Meteor.js, Node.js, express.js, media-soup, React-Native and other technologies like CSS, HTML and HTTPS. I truly believe that anyone can be a good mentor regardless of their age or knowledge.

## | EDUCATION

### Universidad modelo Mexico (2009 - 2013)

Business management

### Unadm Mexico (2014 - 2018)

Software development engineering

- Integrate the APIs generated by the Back-end team.

- Apply the design and logic of operation in the front-end.

- Direct the meetings with the client for the demonstration of modules and advances.

- Create and configure the base project with React-Native, Apollo-Graph-QL, Redux, push

notifications and Fire Base.

**Link: https://www.buxx.mx/**

**Technologies: React-Native, JSX, Fire base, GraphQL, react-apollo, Redux.**

**Fhamy website:**

**Description:** Fhamy is a platform similar to amazon so that artisans can sell their products in different markets.

**Responsibilities:**

- Perform the taking of requirements with the client.

- Design the architecture of the application.

- Design the calendar of activities for the front-end programming team.

- Design the calendar of activities for the back-end programming team.

- Design, together with the backend team, the structure of the base database.

- Integrate the APIs generated by the Back-end team.

- Perform the front end equipment code reviews.

- Apply the design and logic of operation in the front-end.

**Link: https://www.fhamy.mx/**

**Technologies: React.js, Meteor.js, MongoDB, Heroku, HTML, CSS3, Bootstrap and Redux.**

## | Personal projects:

**Alchemist:**

Alchemist.go it's a command cli powered by Go, it's commands allow you to transmute projects with React.js for the client app and Go for the backend api.

**URL:** https://github.com/joaquincamara/alchemist

**Pixel-desk-os:**

It's just a little OS powered by Javascript and React.js

**URL:** https://joaquincamara.github.io/pixel-desk-os/#/home

## | SKILLS

- HTML5/CSS/JavaScript
- SASS
- TypeScript
- React
- Redux
- NodeJS
- npm
- Flexbox
- Golang
- Git

## I LANGUAGES

English (Professional Proficiency)
Spanish (Native)
